

VÖLKL® Hunter Pro

The boot VÖLKL Hunter Pro offers a good fit and is equipped with an innovative air conditioning system. Originally developed for the NASA, the high-tech Outlast® lining material has a temperature-regulating effect and reduces overheating, cooling and sweat production in the shoe. In combination with the Sympatex® membrane, the Outlast® lining also protects against wetness. This high-quality composite material ensures balanced heat conditions and makes the Hunter an ideal companion for all seasons. Equipped with a grippy Vibram® outsole it is also ideal for long walks through rough terrain.

Technical description

- Waterproof nubuck leather, thickness 2,2 - 2,4 mm, smooth padding at the upper edge
- Outlast® lining combined with Sympatex®-membrane, temperature regulating effect, breathable and waterproof
- Easy-Roller in the lower shaft area for quick and easy lacing
